THE MEDICAL SUPERINTENDENT'S TWENTY-FIRST ANNUAL REPORT.

The Medical Officer and Superintendent submits to the Committee of Visitors the Twenty-first Annual Report for the year 1867.

Twenty-
first
Annual
Report.

On the 1st of January 1867 there were upon the books of the Asylum the names of 758 persons of unsound mind, of whom 304 were men, and 454 women; which numbers (in compliance with a request from the office of the Commissioners in Lunacy) include one man who escaped on the 31st December, 1866.

Numbers
Jan. 1, 1867.

During the year 1867, 345 patients were admitted, in the proportions of 161 men to 184 women; being an increase as compared with 1866 (when 93 patients of each sex were admitted) of 159, viz. 68 males, and 91 females. There were discharged 92 males and 118 females, total 210; of whom 41 men and 54 women, total 95, were recovered; 26 males and 22 females, total 48, were relieved; and the remainder, 25 men and 42 women, total 67, were discharged "not improved." One man and one woman escaped, both unimproved. The deaths numbered, males 37, females 36, total 73; and there were left in the Asylum on the 1st January, 1868, 820 patients, 336 of whom were males, and 484 females.

Admissions
and
Removals
in 1867.

The mean daily population of the year was 755 in all; of the men 313, and of the women 442; and the highest and lowest numbers resident were on December 17th and March 17th respectively; on the former day there were 845 patients, 347 of them being males, and 498 females; and on the latter 719, 295 being men and 424 women. The total number of patients resident during the year 1867 was 1103, 465 of whom were men, and 638 women.

Mean daily
population,
&c.

Transfers
to other
Asylums.

In order to relieve in part the overcrowded state of the Asylum, 105 patients have been removed to other Asylums; 34 of each sex having been sent to the Asylum for the City of London, at Stone near Dartford; and 32, 10 of whom were men and 22 women, to Fisherton House Asylum, near Salisbury. Subsequently the operation of a recent Act of Parliament caused an unexpected influx of patients at the City of London Asylum, we were therefore required to remove a portion of those sent there from this Asylum, in order to make room for the City patients. All the patients sent to Dartford were of the better class, and a proportionate augmentation of the more troublesome ones in the Kent Asylum followed as a necessary consequence. On the 1st of January 1868, the City of London Asylum still retained 87 patients belonging to the County of Kent, 59 of whom were males, and 28 females; and on the same day Fisherton House accommodated 10 males and 21 females.

Annual
Returns of
Lunatics.

Upon comparing the annual returns from the Unions for Jan. 1st, 1868, as required to be made by the 64th Section of the "Lunatic Asylums Act 1853," with those of the previous year, it would appear that with respect to lunatics chargeable to the various Unions in the County of Kent, there has been an increase of 59 patients, 38 of whom are men, and 26 women—*e. g.*—

	Males.	Females.	Total.
January 1, 1868 - - -	606	887	1493
January 1, 1867 - - -	568	866	1434
Apparent increase - -	38	21	59

Per centages
of
Recoveries
& Deaths.

The recoveries have been 37.53 per cent. on the admissions; and the year's mortality has again been very low, viz., 6.5 per cent. upon the total number under treatment, as compared, 5.95 in 1866; 7.0 in 1865; 10.40 in 1864; and 11.96 per cent. in 1863.

Small Pox.

Towards the close of September Small Pox was unfortunately introduced into the Asylum with a female patient from the Tunbridge Union House. The eruption appeared on the seventh

day after admission. As soon as the nature of the disease became apparent, complete isolation from the Asylum was immediately effected, by her removal to one of the lodges which had been previously occupied by the male night watch; and a special nurse was engaged to attend upon her, but not however until she had communicated the disease to four of her fellow patients, as well as one of the nurses; these were in turn removed at once to the newly-purchased cottages at the back of the Asylum; and as a preventive measure, upwards of 100 patients, the population of three entire wards, were vaccinated. These efforts were happily crowned with success, and the onward course of this loathsome disease thereby arrested. All the patients attacked recovered, although the disease assumed the confluent form in three cases, which for some time were a cause of anxiety as to the ultimate result.

Some dozen cases also of continued Fever occurred during the year, including two nurses; this disease proved fatal to one female patient, and it is with much regret that I have also to notice the death from Typhus Fever of Elizabeth Albury, a valuable attendant. This nurse caught the disorder whilst in the faithful discharge of her duties. Her fellow attendants shewed their sympathy for her by defraying the entire expenses of her funeral.

Fever.

With the exception of the epidemics as noted above, the general condition of the patients, considering the overcrowded state of the Asylum and the large accumulation of chronic cases, has been throughout the year very satisfactory, and the bodily condition of the patients has been good; this is evidenced by the very low rate of mortality.

General
Condition
of Patients.

The Obituary (Table No. 7) is remarkable for the small number of deaths registered. No fatal accident or other serious casualty has occurred, and no Coroner's inquest has been deemed necessary. Of the 73 deaths which took place during the year, 10 occurred in patients between 70 and 80 years of age, and 5 women died simply of old age decay, without any apparent complications.

Obituary.

General
Paralysis.

Ten men were admitted suffering from General Paralysis of the Insane, and there are at present in the Asylum 16 men and 5 women afflicted with this very fatal disorder.

Commis-
sioners in
Lunacy.

Two of the Commissioners in Lunacy visited the Asylum on the 15th and 16th of October, and reported favourably. Some of their suggestions have been carried out, and others will come into operation as soon as the New Buildings now in course of erection are completed. The favourable reports of these gentlemen are the more valuable, considering that since the year 1856 their visits have been confined to the months of October, November, and December; a period of the year when an Asylum shows to least advantage.

Improve-
ments.

Regulations for bathing have been placed in the bath-rooms, much to the gratification of a large number of the better class of patients. Hand-rails have been supplied to the staircases, fireplaces fixed in the day apartments, additional day attendants have been engaged, and a night attendant on each side of the additional building, and other improvements have been effected.

Enlarge-
ment of
Additional
Building.

The Enlargement of the Additional Building, noticed in last year's Report, has been completed; these apartments were first occupied on November 15th, and now nearly all the beds (96) are filled. This enlargement of the Asylum is known on the books as "Contract No. 1, 1867," that it may be distinguished in future reference thereto from Contracts Nos. 2 and 3. The two latter indicating respectively the Offices, Dining Hall, &c., and the New Building for 400 patients.

New Offices
Dining
Hall, &c.

The New Offices, Dining Hall, &c., being the second section of the enlargement of the Asylum, were commenced on February 11th, 1867.

Additional
Land, &c.

An additional 7 acres of land have been purchased, having thereon three cottages. The total breadth of land now in the occupation of the Asylum is 184a. 3r. 17p.; and we have been successful in effecting certain changes which will enable us to divert the Farleigh and Aylesford Road which passes so close

to some of the wards occupied by the worse class of patients as to be a great annoyance to the public as well as to the patients themselves; causing much excitement, and thereby increasing their malady.

The conduct of the Officers, Attendants, and Servants of the Asylum, has been satisfactory.

Conduct of
Officers,
Servants,
&c.

All of which is respectfully submitted.

WM. P. KIRKMAN, M.D.,
MEDICAL OFFICER AND SUPERINTENDENT.

Barming Heath,
March 20th, 1868.
